Landuse isn't correct either.

Diana:

No, it's not either. The city is working with the parties to get this corrected as well. We're getting close to having shape files for you and ALL of the former Exide property will be zoned "commercial/office" and ALL of the Grand Park parcel will be "recreational".

Respectfully,

Wade

Good morning, Wade!

I just wanted some clarification. I understand that the map I have of Grand Park are not current, but was the map I have of future development plans for where the Exide Facility resides correct?

Thanks!

Diana

Diana:

We're working on cleaning up and converting the attached pdf that we have in a CADD file into a GIS file for you. We think it will have the geolocation data you need but if not we'll try get it inserted for you.

The surveyor with Jacobs engineering is out of the office until Wednesday so we might not have everything until he gets back if there is something missing in the file we have.

Respectfully,
